<https://github.com/BOGALA-AKHILASH-REDDY> | AI/ML Enthusiast | Python & Web Technologies

📍 Hyderabad, India ✉ akhilashreddybogala@gmail.com ☎ 093467 49462

Summary

Highly motivated and detail-oriented Computer Science & Engineering student specializing in Artificial Intelligence and Machine Learning (AI/ML) with a strong foundation in Gen AI. Seeking a Full Stack Developer role in a forward-thinking organization to leverage expertise in web development, Python programming, and problem-solving. Eager to contribute to real-world projects, drive innovation, and grow as a full stack professional.

Skills

Programming Languages: C, Python, Java

Web Technologies: HTML, CSS, JavaScript, Node.js, React, Express.js

Frameworks/Libraries: NumPy, Pandas, TensorFlow, PyTorch, Scikit-Learn, Matplotlib

Databases: MySQL, MongoDB

Tools & Platforms: GitHub, VS Code, Jupyter

Soft Skills: Adaptability, Effective Communication, Critical Thinking, Leadership, Problem-Solving

Projects

Blood Donation App

Oct 2024

- Developed a full-stack web application connecting blood donors with recipients, enhancing community health initiatives.
- Implemented robust user authentication, donor registration, and real-time location-based search functionalities.
- Designed and deployed a responsive user interface (UI) using React.js for the frontend.
- Built a scalable backend API with Node.js and Express.js, managing data flow and application logic.
- Managed and optimized donor and recipient data using MongoDB, ensuring secure data handling and efficient retrieval.

Image Cryptography

Dec 2024

- Engineered a security project focused on safeguarding image data from unauthorized access and tampering.
- Implemented advanced cryptographic techniques, including AES, RSA, and chaotic systems, for image encryption.
- Ensured confidentiality and integrity of image data during transmission and storage through robust encryption protocols.

Smart Attendance through CC-Camera

June 2025

- Designed and developed an intelligent Face Recognition Attendance System utilizing CCTV cameras as input devices.
- Automated real-time detection and recognition of individuals (students/employees) entering premises.
- Integrated facial recognition algorithms to accurately mark attendance without manual intervention.
- Developed functionality to automatically update attendance data in an Excel sheet, streamlining administrative tasks.

Certifications

Data Visualization using Python

- Completed a comprehensive certification from AMIR EDU LLP, mastering Python libraries for data visualization.

Python Data Structures

- Achieved certification from TECH AUGUSTA, demonstrating proficiency in Python data structures and algorithms.

Python for Data Science

- Earned certification from COGNITIVECLASS, focusing on Python's application in data science workflows.

C and Python Programming Workshop

- Participated in an intensive programming workshop by SKILLTIMATE, enhancing foundational skills in C and Python.

Business English Certification Course

- Completed a Business English certification from GETGRAD GLOBAL, improving professional communication skills.

Education

Malla Reddy Engineering College, Computer Science & Engineering (Artificial Intelligence & Machine Learning) — Bachelor of Technology Jan 2023 – present

- Current GPA: 8.78/10

Race College, Kodad, Mathematics, Physics, Chemistry — Intermediate Education Jan 2021 – Jan 2023

- Achieved 96.8% in Intermediate Education.

Krusha Vidyalayam School, Mellacheruvu, Secondary Education Jan 2020 – Jan 2021

- Achieved a perfect GPA of 10/10.

Awards

Winner of the Fundamentals of Physics Quiz

- Secured first place in the college-wide Fundamentals of Physics Quiz, demonstrating strong analytical skills.

Interests

Ethical Hacking

Web Development

Volunteer

Malla Reddy Engineering College, Event Host

- Hosted the VISHESH 2K24 Technical Event, showcasing strong organizational and public speaking skills.
- Anchored the Graduation Ceremony twice, effectively managing event flow and engaging audiences.
